

Aung Kyaw Kyaw Soe

Senior Full Stack Developer

PROFILE

Senior Full Stack Developer (6+ years) bridging modern web technologies, backend architectures, and multi-platform integrations. Expert in Next.js, React, and Node.js for building scalable enterprise web portals and REST/GraphQL APIs. Adept at driving end-to-end product implementation—from database modeling (PostgreSQL, MongoDB) and Docker deployment to custom Telegram Mini Apps and Flutter solutions

WORK EXPERIENCES

Senior Full Stack Developer | MEX HR (2023 – Present)

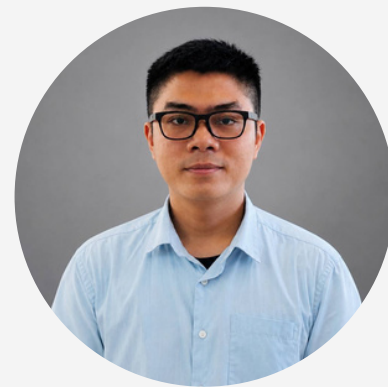

- Enterprise Operations Platform:** Architected and developed a modular Enterprise Logistics & Operations Platform encompassing Vehicle Tracking, Fuel Management, MRO, Logistics, and HRM modules.
- API & Backend Architecture:** Engineered high-performance Node.js RESTful APIs for complex business logic, real-time fleet/trip analytics, and cross-platform data synchronization.
- Database & Dashboard Design:** Designed scalable PostgreSQL database schemas and responsive dashboards using Next.js to optimize enterprise workflows.
- Automated Bots & Webhooks:** Implemented custom Telegram Bots and Webhooks for automated employee clock-in/out, trip alerts, and real-time operational notifications.

Full Stack Developer | Myanmar Score - Live Score App (2020 – 2023)

- Platform Scaling:** Maintained a high-performance live score sports platform serving 100k+ active users during peak match hours.
- Frontend & Backend Integration:** Developed real-time React dashboards and Node.js APIs for high-frequency live sports data ingestion.
- Optimization:** Fine-tuned data fetching, caching mechanisms, and state management under heavy user traffic to ensure low latency.

Mobile & Web Developer | Ding Delivery System (2019 – 2020)

- Delivery Management System:** Built full-stack logistics software to automate order dispatching, driver routing, and delivery status tracking.
- Real-time Tracking & POD:** Integrated Socket.io and Webhooks with Node.js to implement real-time order updates and digital Proof of Delivery (POD) modules.
- Responsive Admin Portal:** Developed responsive React web dashboards with optimized state management for logistics coordinators to track live deliveries.
- Database & API Design:** Designed relational database schemas (MySQL/PostgreSQL) and RESTful APIs for fast status synchronization between web and mobile clients.

TECHNICAL SKILLS

Full Stack Core

Next.js, React, Vite, Node.js, Express, TypeScript, Telegram Bot / Mini Apps,

API & Architecture

RESTful APIs, GraphQL, Webhooks, Clean Architecture

Databases & Cloud

PostgreSQL, MongoDB, MySQL, Firebase, SQLite, Hive

DevOps & Tools

Git, Docker, Nginx, Cloudflare, Postman, CI/CD

Mobile Capabilities

Flutter, Dart, Swift, Kotlin, Java

EDUCATION

DAGON UNIVERSITY

Bachelor Degree in Mathematics
Completed in 2023

CERTIFICATIONS

STRATEGY FIRST UNIVERSITY

Business Management & Administration

Advanced React (Meta)
